Strength Across Both Compute and Networking Drives Another Beat and Raise

NVIDIA delivered a F4Q26 beat, while F1Q27 revenue was also well above expectations driven by continued strength across the data center portfolio. Our key takeaways include: 1) Q/Q revenue growth is expected through CY26 with demand expected to continue into CY27; 2) Hyperscalers made up ~50% of data center revenue, while other verticals continue to contribute to growth. Jensen is confident hyperscaler cash flow will increase in the future to support growing Capex given advancements in compute driving increased token output; 3) Networking opportunities are also growing for both scale out and scale up; 4) Vera Rubin sampling is underway and production remains on track for C2H26; and, 5) NVDA is deepening engagement with frontier model developers.

Our PT remains $240, based on a ~25x P/E multiple of our FY28/CY27 NG EPS estimate of $9.75.

Q/Q revenue growth expected through CY26, demand expected to continue into CY27.

NVDA's data center revenue once again grew strongly Q/Q in F4Q26 (+21.7% Q/Q) and management expects continued sequential revenue growth through CY26, with demand expected to continue into 2027. Purchase commitments have increased "significantly" (to $95Bn from $50Bn last quarter) as the company looks to secure capacity to meet demand into 2027. These purchase agreements extend out longer than normal given tight supply and NVIDIA's strong visibility into continued demand. Management now expects to exceed the $500BN Blackwell + Rubin revenue target across 2025 and 2026 discussed at the end of CY25. Finally, gaming revenue is facing severe supply constraints over the next few quarters that could potentially limit revenue in this segment.

Hyperscalers made up 50% of data center revenue, while other verticals continue to grow.

Capex from the top 5 hyperscalers has increased by ~$120BN since the start of the year and is now approaching $700BN. These top 5 hyperscalers accounted for approximately half of data center revenue in the quarter. Jensen pointed out that he is confident that hyperscaler cash flow should increase in the future as increases in compute drive increased token output, which, in turn, drives revenue growth (e.g., compute = revenue). We note the other half of the data center revenue is coming from AI model makers, Sovereign, Enterprise and Supercomputing customers. Sovereign AI revenue more than tripled to >$30BN in FY26 driven by projects in Canada, France, the Netherlands, Singapore and the UK.

Networking opportunities also growing for both scale out and scale up.

Networking revenue in the quarter was $11BN and was up over 3.5x Y/Y. Management highlighted that the Y/Y growth primarily was driven by NVLink scale up switch adoption. Additionally, NVDA is also seeing momentum in scale out with its Spectrum-X Ethernet and Quantum Infiniband solutions. Networking revenue is about equally split among NVLink, Ethernet and Infiniband.

At a Glance

OUR INVESTMENT THESIS

Our Buy rating is based on the following factors: 1) attractive valuation and favorable risk/reward profile: 2) continued growth in Capex from key hyperscaler customers purchasing next-gen GPU architectures; 3) further growth in training and inference applications across end market verticals; 4) data center build-outs are robust as AI compute adoption accelerates throughout the world beyond traditional hyperscaler customers. We believe data center, the end-market that we view as NVDA's biggest growth engine, will continue to undergo its shift towards accelerated computing and AI. We expect the competitive dynamics in the data center market can exert pressure on the company's long-term positioning; however, we believe several industries will transition to AI-based systems faster than before.

BULL CASE ASSUMPTIONS

Higher than expected GPU growth rates, rapid adoption of Omniverse, acceleration in auto sales, increase in competitive advantage in data center and gaming, PC market stronger than expected.

BASE CASE ASSUMPTIONS

Data center strength continues, with the Blackwell + Rubin opportunity expected to exceed the company's $500BN target. Both compute and networking subsegments are expected to continue to exhibit strong growth as new architectures are rolled out.

BEAR CASE ASSUMPTIONS

Deterioration in macro environment, slowdown in GPU proliferation, gross margin pressures, increased competition in data center causes NVDA to lose share, sharp decline in China gaming, slowdown in PC.

COMPANY DESCRIPTION

NVIDIA Corporation is a leading provider of accelerated computing solutions, specializing in GPUs and full-stack AI platforms that serve data center, gaming, and professional visualization markets. The company's CUDA architecture and proprietary software ecosystem underpin its leadership in AI training and inference workloads, with expanding adoption across hyperscale, enterprise, and automotive end markets.

Vera Rubin sampling underway; production timing intact, China still excluded.

Management indicated that initial Vera Rubin samples were delivered to customers earlier this week, with the company remaining on schedule for production shipments to begin in C2H26. Early customer engagement appears robust, with management noting broad interest and an expectation that all major cloud model builders will ultimately deploy the platform. That said, visibility into the magnitude of C2H26 shipments remains limited at this stage. Separately, the company continues to assume no Data Center revenue contribution from China in its current outlook.

Deepening engagement with frontier model developers across hardware and strategic partnerships.

The company continues to broaden and reinforce relationships with leading frontier model makers. On the call, Jensen highlighted ongoing work with OpenAI toward a formal partnership agreement, noting discussions are advancing and nearing completion. As discussed in a note we published last week , Meta recently disclosed plans to deploy millions of Blackwell and Rubin GPUs, NVIDIA CPUs, and Spectrum-X networking solutions across training and inference workloads. During the quarter, NVIDIA also announced a strategic partnership with Anthropic, alongside a $10BN investment, with Anthropic expected to train and run inference on Grace Blackwell and Vera Rubin systems. In addition, the company entered into a non-exclusive licensing agreement with Groq covering low-latency technology and brought on a team of engineers.

Seeing the inflection in agentic AI adoption, which is driving inference demand.

Management emphasized frontier agentic systems have reached a clear inflection point, which is translating into a meaningful step-up in inference activity across the company's customer base. Jensen reiterated multiple times that agent-driven workloads are now generating substantially higher token volumes. This dynamic is driving the need for significantly higher-speed inference infrastructure, reinforcing demand for the company's accelerated computing platforms.

F4Q26 Report: Better revenue and gross margin more than offset higher than expected OpEx, resulting in a $0.09 EPS beat.

NVIDIA posted revenue of $68.1BN, +19.5% Q/Q and +73.2% Y/Y, above our estimate of $66.0BN and the Street's $65.9BN estimate. By segment, Data Center (+21.7% Q/Q), Professional Visualization (+73.8% Q/Q), and Auto and Robotics (+2.0% Q/Q) beat our estimates. Within Data Center, both Compute (+19% Q/Q) and Networking (+34% Q/Q) grew sequentially. Gaming (-12.6% Q/Q) and OEM & Other (-7.5% Q/Q) missed our estimates. Non-GAAP gross margin came in at 75.2%, above our and the Street's estimate of 75.0%. Margins increased sequentially as Blackwell continued to ramp. Non-GAAP OpEx in the quarter was $5,102MM, slightly above our estimate of $5,000MM, due to new product introductions and compute and infrastructure costs. Non-GAAP EPS was $1.62, above our and the Street's estimate of $1.53. The beat was driven by better revenue and gross margin, which more than offset higher than expected OpEx.

F1Q27 Guide: Revenue and gross margin come in ahead. Now including stock-based compensation expense in non-GAAP numbers.

The company guided revenue to $78.0BN at the midpoint, +14.5% Q/Q and +77.0% Y/Y, above our estimate of $73.0BN and the Street's $72.3BN estimate. The majority of growth in the quarter is expected to be driven by Data Center. Similar to last quarter, this outlook assumes no Data Center Compute revenue from China. Non-GAAP gross margin is expected to be 75.0% at the midpoint, in line with our and the Street's estimate. Margins are expected to remain in the mid-70%s throughout FY27. Non-GAAP OpEx is expected to be $7,500MM, above our estimate of $5,500MM. This includes $1,900MM of stock-based compensation. For FY27, OpEx is expected to grow in the low-40s Y/Y as the company continues to invest in growth opportunities.

Non-GAAP EPS should come in at $1.73 at the midpoint, above our estimate of $1.69 and the Street's estimate of $1.67.

End-Market Commentary: Data Center, Professional Visualization, and Auto and Robotics beat our estimates. Gaming and OEM & Other missed.

Data Center revenue set another record at $62.3BN, growing +22% Q/Q and +75% Y/Y. Growth was driven by major platform shifts, both accelerated computing and AI. Grace Blackwell systems made up ~two-thirds of revenue in the quarter. Within F4Q26, hyperscaler revenue increased, and these customers remained the largest category. Similar to last quarter, demand was seen across every market including CSPs, sovereigns, and enterprise. The top 5 hyperscalers accounted for just over half of Data Center revenue. The company shipped its first Vera Rubin samples to customers earlier this week, and remains on track to begin production shipments in C2H26. The company expects Q/Q growth throughout CY26, exceeding what was included in the $500BN Blackwell and Rubin revenue opportunity across 2025 and 2026 it had shared late last year. Additionally, management believes the company has inventory and supply commitments in place to meet future demand, including shipments reaching into CY27. Both Compute (+19% Q/Q) and Networking (+34% Q/Q) grew. We model F1Q27 Data Center revenue of $72.2BN, +15.9 % Q/Q.

- **Compute** revenue was $51.3BN, +19% Q/Q and +58% Y/Y.

- **Networking** revenue was $11.0BN, +34% Q/Q and +263% Y/Y. Demand for scale up and scale out technologies reached record levels, both growing double-digit Q/Q. This was driven by the strong adoption of NVLink, Spectrum-X Ethernet, and InfiniBand. Y/Y growth was driven mainly by NVLink72 scale up switches.

Gaming revenue was $3.7BN, -13% Q/Q and +47% Y/Y. Revenue declined sequentially due to channel inventory moderating following a strong holiday season. We model F1Q27 Gaming revenue of $3.7BN , down 0.7% Q/Q, as this segment faces supply constraints that are expected to last several quarters.

Professional Visualization revenue of $1.3Bn, +74% Q/Q and +159% Y/Y. The sequential increase was driven by strong demand for Blackwell. We model F1Q27 Professional Visualization revenue of $1.3BN, down 1.6% Q/Q.

Automotive and Robotics revenue of $604MM, +2% Q/Q and +6% Y/Y. Revenue increased sequentially due to the continued adoption of NVIDIA's self-driving platforms. We model F1Q27 Automotive and Robotics revenue of $625MM , +3.5% Q/Q.

VALUATION (PRICE TARGET: $240.00)

- Our 12-month price target of $240 remains unchanged, based on a ~25x P/E multiple of our CY27/FY28 NG EPS estimate of $9.75.

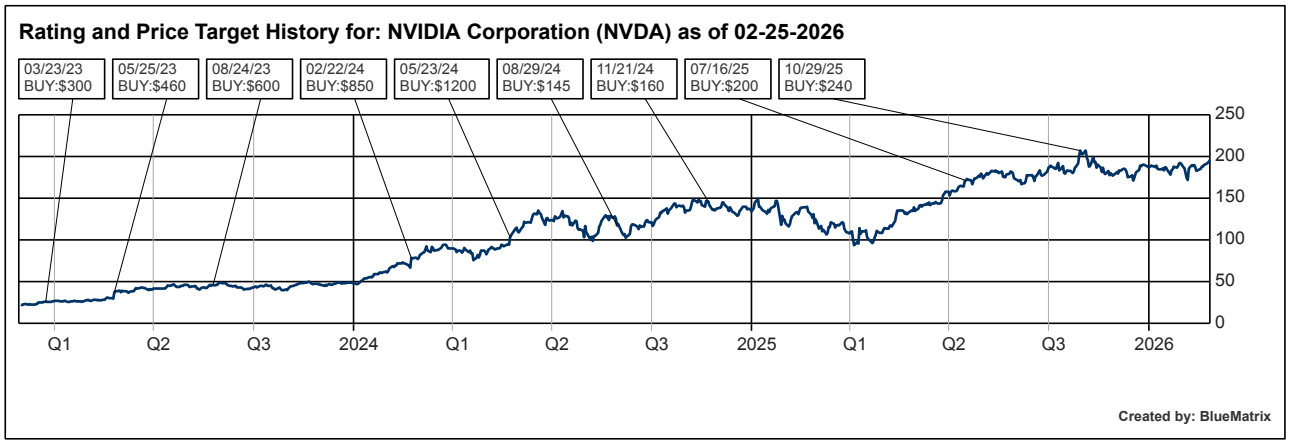
POTENTIAL UPSIDE DRIVERS

- Higher penetration of Blackwell and eventually Rubin GPUs across all major verticals; rapid adoption of NVIDIA networking solutions

RISKS TO TARGET

NVDA

- Deceleration of GPU growth rates, lower gross margins due inventory charges, and competition in the data center and AI markets from custom ASICs (e.g., Google TPUs or Amazon Trainium), FPGAs and other technology advances.



ANALYST CERTIFICATION

I, N. Quinn Bolton hereby certify that the views expressed in this research report accurately reflect my personal views about the subject company (ies) and its (their) securities. I, also certify that I, have not been, and will not be receiving direct or indirect compensation in exchange for expressing the specific recommendation(s) in this report.

RATINGS DISTRIBUTIONS FOR NEEDHAM & COMPANY, LLC

	% of companies under coverage with this rating	% for which investment banking services have been provided for in the past 12 months
Buy	76	19
Hold	24	5
Underperform	< 1	0
Rating Suspended	0	0
Restricted	0	0

Needham & Company, LLC employs a rating system based on the following:

Buy: A security, which at the time the rating is instituted, we expect to outperform the average total return of the broader market over the next 12 months.

Hold: A security, which at the time the rating is instituted, we expect to perform approximately in line with the average total return of the broader market over the next 12 months.

Underperform: A security, which at the time the rating is instituted, we expect to underperform the average total return of the broader market over the next 12 months.

Rating Suspended: We have suspended the rating and/or price target, if any, for this security, because there is not a sufficient fundamental basis for determining a rating or price target. The previous rating and price target, if any, are no longer in effect and should not be relied upon.

Restricted: Needham & Company, LLC policy and/or applicable law and regulations preclude certain types of communications, including an investment recommendation, during the course of Needham & Company, LLC's engagement in an investment banking transaction and in certain other circumstances.

For disclosure purposes, in accordance with FINRA requirements, Buy ratings most closely correspond to a "Buy" recommendation. Hold ratings mostly correspond to a "Hold/Neutral" recommendation; while our Underperform rating closely corresponds to the "Sell" recommendation required by the FINRA.

Our rating system attempts to incorporate industry, company and/or overall market risk and volatility. Consequently, at any given point in time, our investment rating on a security and its implied price appreciation may not correspond to the stated 12-month price target. For valuation methods used to determine our price targets and risks related to our price targets, please contact your Needham & Company, LLC salesperson for a copy of the most recent research report.

Price charts and rating histories for companies under coverage and discussed in this report are available at http://www.needhamco.com/ . You may also request this information by writing to: Needham & Company, LLC, Attn: Compliance/Research, 250 Park Ave., New York, NY 10177

By issuing this research report, each Needham & Company, LLC analyst and associate whose name appears within this report hereby certifies that (i) the recommendations and opinions expressed in the research report accurately reflect the research analyst's and associate's personal views about any and all of the subject securities or issuers discussed herein and (ii) no part of the research analyst's or associate's compensation was, is or will be directly or indirectly related to the specific recommendations or views expressed by the research analyst or associate in the research report.

DISCLOSURES

The research analyst and research associate have received compensation based upon various factors, including quality of research, investor client feedback, and the Firm's overall revenues, which includes investment banking revenues for the following: NVIDIA Corporation

The Firm, at the time of publication, makes a market in the subject company NVIDIA Corporation .

This report is for informational purposes only and does not constitute a solicitation or an offer to buy or sell any securities mentioned herein. Information contained in this report has been obtained from sources believed to be reliable, but Needham & Company, LLC makes no representation as to its accuracy or completeness, except with respect to the Disclosure Section of the report. Any opinions expressed herein reflect our judgment as of the date of the materials and are subject to change without notice. The securities discussed in this report may not be suitable for all investors and are not intended as recommendations of particular securities, financial instruments or strategies to particular clients. Investors must make their own investment decisions based on their financial situations and investment objectives. The value of income from your investment may vary because of changes in interest rates, changes in the financial and operational conditions of the companies and other factors. Investors should be aware that the market price of securities discussed in this report may be volatile. Due to industry, company and overall market risk and volatility, at the securities current price, our investment rating may not correspond to the stated price target. Additional information regarding the securities mentioned in this report is available upon request.
